

SUPERSTAR® CLASSIC Dimmer Compatibility

BASIC INFORMATION:

1. HOW MANY LAMPS CAN I INSTALL ON ONE DIMMER?

For max. number of lamps on a dimmer, please use the following rule of thumb:
(Please note: actual number may vary from calculated result)

$$\frac{\text{Max load of dimmer}}{\text{equivalent wattage (HAL/GLS)}} = \text{max. number of lamps}$$

2. WHAT IS THE PRODUCT CODE AND WHERE DO I FIND IT?

The product code describes the lamp type. It contains 7 letters and digits and is starting with A...

Example for the product code on the stamp of the lamp:

220-240V · AA68602 · 4000K
6W · 50/60Hz · 27mA
Made in Germany XXX-XXXX

3. HOW CAN I READ THE FOLLOWING CHARTS?

SUPERSTAR® CLASSIC Dimmer Compatibility

Legend:
Information about the dimmability of the lamps. Green means very good dimmability habits, red means partial critical dimmability habits.

Dimmability traffic light system:	
■ Green	very good dimmability habits (Dimming range ≥ 75%)
■ Yellow	good dimmability habits (Dimming range ≥ 60%)
■ Red	partial critical dimmability habits (flickering or acoustic noises may occur) (Dimming range < 60%)
■ White	not tested

Test results of dimmability according to the traffic light system

Example: Dimmer Berker 2874 shows very good dimmability habits for one SUPERSTAR CLASSIC A60 ADV lamp.

SUPERSTAR® CLASSIC Dimmer Compatibility

Dimmability traffic light system:

- Green very good dimmability habits (Dimming range ≥ 75%)
- Yellow good dimmability habits (Dimming range ≥ 60%)
- Red partial critical dimmability habits (flickering or acoustic noises may occur) (Dimming range < 60%)
- White not tested

SUPERSTAR® CLASSIC

Dimmer Compatibility

Please Note:

- The compatibility list is based upon testing conducted by the manufacturer in a lab simulated environment, and the results can vary in certain field applications due to a number of factors. OSRAM does not take over any responsibility, warranty or liability that this results can also achieved by using the devices under other conditions, or when using successor models of the tested devices, or different models of the same manufacturer, or when using other LED lamp types
- The absence of a dimmer from this chart does not necessarily imply incompatibility.
- Please reference the dimmer manufacturer's instructions for installation.
- LED lamps contain several electronic components. Under unfavourable conditions these can lead to acoustic noise. In case of resonance even low noise can cause audible effect. Possible factors influencing this are the installation, the design of the lamp holder and the luminaire (acoustic resonance effect) as well as the dimmer or the transformer (harmonics or electronic resonance).
- Subject to change without notice
- Errors and omission excepted
- Always make sure to use the most recent release

Application Notes:

- For best dimming results trailing edge dimmer type is recommended.
- Trailing edge type dimmer requires the neutral wire for installation.
